

Example of Using Fidelity and Progress Monitoring Data to Determine Next Steps

	Student Progress "Good" (Is meeting, or will meet goals)	Student Progress "Questionable" (Improved, but unlikely to reach goals)	Student Progress "Poor" (No improvement over baseline; Will not reach goals)
Fidelity of Implementation "High"	<ul style="list-style-type: none"> Continue Interventions Continue Monitoring Plan for Fading Interventions Plan for Changing Intervention Targets Document what works Report/Share what works <ul style="list-style-type: none"> Develop and archive locally identified evidence-based treatments for future use. Celebrate Success 	<ul style="list-style-type: none"> Continue Interventions Continue Monitoring Document what is working Consider increasing "dosage" of intervention/treatment Consider additional intervention components Consider return to PS 	<ul style="list-style-type: none"> Discontinue Interventions Discontinue Monitoring Document intervention failure. Ensure fidelity of PS process in design of plan used. <ul style="list-style-type: none"> Ensure use of evidence-based interventions or strategies Ensure intervention match to need Consider other evidence-based interventions that match same need Review hypotheses to include or exclude to develop new plan Ensure problem validation Return to PS process if no concerns with fidelity of PS process used last time. Consider greater depth of PS (e.g. more expertise, in-depth problem analysis). Consider more intensive interventions
Fidelity of Implementation "Moderate"	<ul style="list-style-type: none"> Continue Interventions Continue Monitoring Plan for Changing Intervention Targets Document what was actually provided to student and what works. Determine if other variables not included in intervention plan led to improved results – document. Report/Share what works <ul style="list-style-type: none"> Develop and archive locally identified evidence-based treatments for future use. Celebrate Success 	<ul style="list-style-type: none"> Continue Interventions Continue Monitoring Check for barriers affecting intervention plan fidelity. Identify and use strategies to remove barriers affecting fidelity and increase fidelity. Document what is working. Adapt/Update plan as needed to reflect changes to improve fidelity Schedule for another review to ensure fidelity is improved and progress is continuing to improve 	<ul style="list-style-type: none"> Continue Interventions Continue Monitoring Check for barriers affecting intervention plan fidelity. Identify and use strategies to remove barriers affecting fidelity and increase fidelity. Check for fidelity of problem solving process. Re-engage in PS as needed to ensure fidelity of PS. Document what is working. Adapt/Update plan as needed to reflect changes to improve fidelity Schedule for another review to ensure fidelity is improved and progress is improving
Fidelity of Implementation "Low"	<ul style="list-style-type: none"> Continue Interventions Continue Monitoring Plan for Changing Intervention Targets Document what was actually provided to student and what works. Determine if other variables not included in intervention plan led to improved results – document. Report/Share what works <ul style="list-style-type: none"> Develop and archive locally identified evidence-based treatments for future use. Celebrate Success 	<ul style="list-style-type: none"> Continue Interventions Continue Monitoring Check for barriers affecting intervention plan fidelity. Identify and use strategies to remove barriers affecting fidelity and increase fidelity. Document what is working. Adapt/Update plan as needed to reflect changes to improve fidelity Schedule for another review to ensure fidelity is improved and progress is continuing to improve 	<ul style="list-style-type: none"> Continue Interventions Continue Monitoring Check for barriers affecting intervention plan fidelity.
