

BEHAVIOR RATING SCALE

Student Name: _____

School: _____

Grade: _____

Observer(s): _____

Instructions: On the left side of the data sheet, write in the behaviors that will be tracked. In the next column, develop the scale that will be used to rate the behavior #1 – 5. For example, 1 = Rare 0-2 incidents, 2 = 3-4 incidents, 3 = Moderate 5-6 incidents, 4 = 7-8 incidents, and 5 = Frequent 9+ incidents. The scale you develop will vary per student and behavior. When collecting data, write the date at the top of the form, and circle the appropriate rating. To graph the data, connect the circles across dates within each type of behavior.
