WORKSHEET INSTRUCTIONS FOR OBSERVATIONS

PURPOSE

The purpose of Part 1 of this tool is to confirm that person-centered strategies and positive behavior supports are actively used by staff in a particular setting. Part 2 of this observation evaluates opportunities that staff members or people living and/or working in a particular setting have opportunities to be actively involved in positive interactions. This tool is intended to be used four times annually in one setting, and can be implemented in multiple settings.

INSTRUCTIONS

- 1. Identify the setting they observation will be occurring within and write it at the top of the worksheet preparation form.
- 2. List out the people who are present at each observation and identify those who are being observed by circling them. Include the date of the observation.
- 3. Identify the positive social behaviors for each person being observed using the positive interaction matrix developed for that setting (see Definitions of Each Item on the Minnesota Direct Observation Form for an example of a positive social interaction matrix). The positive social behaviors will be different for each person depending on how they communicate. Providing examples and nonexamples of these behaviors for each person will be essential for observers to prepare for an observation. Please indicate examples and nonexamples in the Worksheet Preparation Form under "Define Positive Social Behaviors for Person".
- 4. Before and after an observation, please review the definitions for each of the items on the Observation Form.
- 5. Allocate 20 minutes for each of the three observational settings using a timer or stopwatch to record the time.
- 6. Indicate a noted behavior has occurred within an interval when one example or instance of the behavior has occurred AND zero instances of non-examples of the behaviors occurred. For example, mark a plus for person-first language use if a staff member says "Sally is a person who experiences deafness." However, if in the same interval, a staff member stays "Bobby is autistic," then the interval becomes a circle (interval is NOT scored as a plud). Please refer to the attached "Observation tool definitions" form for detailed instructions on how to score each noted behavior.
- 7. To score an interval, both the person being observed needs to be present throughout the interval, therefore if a staff member or person being supported need to step out of the observation (e.g., someone needs to use the restroom, or other such situation), the observer should pause the interval until they are back and then resume. If someone is unavailable to be observed (e.g., the person being supported feels uncomfortable and goes to their bedroom for some space), the interval should be marked as unobservable and should not be counted within the total score.
- 8. Conduct the observation of the setting and indicate on the MN Direct Observation Form which person-centered and positive behavior support items are present during the observation session.
- 9. Keep a copy of the Worksheet Preparation Form and the MN Direct Observation Form and submit *only* the MN Direct Observation Form to

Worksheet Preparation Form

Include the following details for each setting:
SETTING 1 ACTIVITY:
Observation 1:
Date and Time of Observation:
Names of Staff Present:
Observation 2:
Date and Time of Observation:
Names of Staff Present:
Observation 3:
Date and Time of Observation:
Names of Staff Present:
Observation 4:
Date and Time of Observation:
Names of Staff Present:

DEFINE POSITIVE SOCIAL INTERACTIONS FOR THE PERSON:

Please define positive social behaviors that the person being observed engages in and write your notes so that observer knows what behaviors to record. Include examples and non examples of each behavior that corresponds to the person centered values in the setting observed. Examples are included in the section called *Definitions of Each Item On the Observation Form*. Complete this form for each setting or person observed.
